Description

Giganet offers 45U Cabinets that can fit your data center needs. When choosing a rack or enclosure, one important factor to consider is knowing your server rack cooling strategy. The type of rack you choose will depend on the cooling methods used in your environment. Another point to consider would be selecting an appropriately-sized rack. When selecting a rack, you want to be sure it has sufficient internal space to house your current equipment and ensure that you have ample space to accommodate planned future expansion. Making sure your rack fits into your overall security strategy is just as important too. There are several meas-ures you can take to improve the security of the racks and equipment in your data center.Though it consumes no electricity and contains no moving parts, the rack and enclosure orientation has a significant impact on a data center's ability to become an energy efficient enterprise.

PRODUCT INFORMATION

Features and Benefits
