

Product overview

Gigaset HD cassettes are pre-terminated modules MTP/MPO-LC/SC fanouts that are suitable for up to 100G applications to interconnect backbone with discrete connections. The HD cassettes are designed to easily plug into Gigaset HD chassis and each chassis can populate up to 96F. The cassettes eliminate the need for splicing reducing costs. The MTP/MPO and single ferrule connectors are available in Standard and Premium versions to cater customer's power budget requirements.
