

Product overview

Giganet Two pole racks are primarily used to install communication and network equipment. Computing equipment can be installed in 2 pole server racks with the use of specialized rail kits. These rail kits allow the equipment to be installed in either a center mount or a flush mount configuration.

Product Features and Applications

FEATURES
SPCC quality cold-rolled steel
2-pole open racks for standard 19-inch EIA mounting
Sturdy steel construction
DIY Type
Easy to assemble
Strong structure, profound technical and economical
Install caster and support feet at same time
Detectable composite structure, more convenient for being shipped
Maximum carrying capacity: 800kg

CHARACTERISTICS	
Type	Value
Width (in mm)	600
