

**Overview**

In the datacomm world, “co-location” is the term commonly used to discuss the support the data center needs of a number of companies within a single, service facility. Each client is able to “lease” their own enclosure space, in whatever quantity they desire, whether it be an entire rack or only a portion of one, with the knowledge that all power, cooling and cable management will be taken care of by the data center’s management staff.

**Description**

Giganet offers our “CO-LO” series of enclosures which provide two (GN-DC-6742-20U & GN-DC-8742-20U) separate (and secure) lockable enclosure spaces within the “footprint” of a single enclosure.

Each Giganet CO-LO enclosure offers so much more than others on the market. Our co-location enclosures go far beyond the simple shelves and multiple doors offered by others as their separation mechanism. Each co-location space within the Giganet CO-LO enclosure offers a unique, separate and secure cabinet, within an 84”H X 28”X 36”cabinet footprint.

Each co-location space is exclusive; there are unique, proprietary channels (vertical raceways on the side and in the rear of the space) which allow power and cable management to move in and out of the space in a secure manner without mingling with or having access to any other spaces within the enclosure. Each space is also protected from intrusion by any other enclosure “tenants” as well as any falling debris or errant hardware which may be left or dropped from one or more of the spaces above.

Giganet Co-Lo enclosures are available with mesh front & rear doors or with vented plexi front doors and solid rear doors with built-in exhaust fans

If you’re in the co-lo business, either to isolate equipment from different departments at your facility or to host equipment from different companies, the Giganet CO-LO series of enclosures may provide the perfect solution.

ORDERING INFORMATION	
Product Description	Part Number
Giganet 42U 600x1070 DC Split Colo Cabinet	GN-DC-6742-20U
Giganet 42U 800x1070 DC Split Colo Cabinet	GN-DC-8742-20U
Giganet 600x1070 / 800x1070 Vertical Cable Tray, 150mm Set of 2 20U	GN-301-16-CT22U
